ETHERNET ALLIANCE

A global community of end users, system vendors, component suppliers and academia.

MISSION

- Promote existing and emerging IEEE 802 Ethernet standards
- Accelerate industry adoption
- Demonstrate multi-vendor interoperability

WHY JOIN?

- Influence standards
- Drive product adoption in the market
- Prove Interoperability of your product with market leaders
- Network with Industry Leaders
- Increase Market awareness & knowledge of your products
- Industry collaboration and consensus building

CONVERGENCE IS NOW!

DEMO OVERVIEW

Ethernet Alliance is proud to showcase a converged LAN and SAN 10/40GE data center fabric. Avago Technologies, Aquantia, Dell Networking, Dell Storage, Intel, Panduit and QLogic come together to showcase a live data center demonstration showing an open standard Ethernet based solution where Ethernet Alliance members are demonstrating full interoperability.

The live demonstration consists of:

- Lossless 10GE iSCSI SAN traffic with Data Center Bridging functionality
- 40GE connectivity using passive and active links
- 40GE to 10GE link connectivity via breakout links – fiber or copper
- Converged Network Adapter interoperability

Stop by the Ethernet Alliance booth #1958 to see how a mixed vendor data center environment is possible and be open to new ideas.
